The Logo

Energy and heat of sun; a breeze from ancient civilizations of Anatolia

A wild flower tulip brought from Central Asia to İstanbul through Silk Road; grown by Ottomans and shared with the world

A bridge connecting not only the continents but also natural resources and markets, and between tradition and modernity

The Maiden's Tower, one of the most known symbol of İstanbul, a natural island in the middle of Bosphorus, a lighthouse guiding seamen from past to today

Expected Outcomes

- Offering solutions to today's problems
- Projecting the future of energy markets and developing alternative solutions from now on
- Building bridges between different markets, future expectations, and regulation levels as well as different priorities
